ASSIGNMENT- 2

Read the passage given below and answer the questions that follow:-

Trees are an essential part of our natural environment. Trees provide us with many benefits. They produce oxygen through photosynthesis, which is essential for our survival. They also absorb carbon dioxide, which is a harmful gas and contributes to climate change. Trees also provide shade to us, which provides relief to all living beings during the hot summer days.

Forests provide protection to a wide variety of animals, birds, and insects, many of which depend on trees for food and shelter. Trees also help prevent soil erosion, which is important for maintaining healthy ecosystems.

Unfortunately, many forests around the world are being destroyed due to deforestation, trees being cut for commercial purposes. Deforestation has many adverse effects on the environment, including soil erosion, loss of biodiversity, and climate change.

It is very important that we should take steps to protect trees and forests. We can plant more trees around us, support reforestation programs, and reduce our consumption of products that contribute to deforestation, such as palm oil. By doing so, we can help ensure a healthy and sustainable future for ourselves and future generations.
