F-Block, Sector – 9, Rohini, Delhi - 85**

Circular No. : HIS/23-24/P7

Date : 25.7.2023

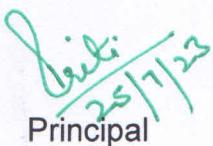

Dear Parents,

I hope this message finds you well. We regret to inform you that there has been a recent outbreak of eye flu among children in Delhi. As a precautionary measure, we kindly request that you do not send your ward to school until they have fully recovered from the illness.

Eye flu, also known as conjunctivitis, is a contagious condition that can easily spread among children in close contact, such as in a school setting. To prevent further transmission and ensure the well-being of all our students, we urge you to closely monitor your child's health and keep them at home until they are completely free of symptoms.

Symptoms of eye flu include redness, itching, tearing, and discharge from the eyes. If your child exhibits any of these symptoms, please seek medical attention promptly and keep them isolated from other children until they have recovered completely.

Thank you for your cooperation.

Principal
